RE: Reply comments
RM 7869

Dear Sirs,

I encourage the FCC to set aside 222 to 222.15 for "narrow band" weak signal operations and other non FM operations. The loss of 220 to 222 was where this activity used to be and only an FCC rule will make a place available for weak signal SSB/CW activity.

It is a problem in metropolitan areas where there are repeaters in the low end of 222.

The weak signal users hope the FCC reinstates a weak signal segment.

Sincerely,

Larry Lambert
